

The Biopharmaceutical Applied Statistics Symposium (BASS) XXIV is scheduled for October 23-27, 2017 at the Hotel Indigo in Savannah, GA. This meeting brings together pharmaceutical industry statisticians, leading academic statisticians and regulators to discuss important statistical and regulatory topics in a format that allows for thorough exposition and extended discussion in an informal and interactive atmosphere. What's more, any profits from this symposium are used to support graduate students in biostatistics. Since BASS began in 1994, BASS has supported graduate students in biostatistics, many of whom now work in the pharmaceutical industry, academia or in government. So BASS contributes in a major way to furthering biostatistics in these three important sectors. Currently, 3 doctoral students are being supported through BASS Fellow Endowments and we expect to provide travel stipends of up to \$1000 to each of 5 students to allow them to experience BASS in 2017. Please consider making a contribution to BASS, a 501(c) (3) non-profit corporation.

Donations in any amount to BASS are welcome. With a donation of \$1000 or more, recognition will be extended to sponsors in the following ways:

- Listing with corporate logo on BASS website
- Listing with corporate logo on BASS program
- Announcement at BASS Banquet

Questions should be directed to Anthony Segreti, [segretia@bellsouth.net](mailto:segretia@bellsouth.net), 919-417-5181.

Please send donations to:  
Anthony Segreti  
BASS Chair,  
1104 Askham Drive  
Cary NC 27511

Checks should be made out to Biopharmaceutical Applied Statistics Symposium (BASS), Inc.
